Warnings

The machine is designed and intended for private use. It should only be used on proper rifle scope. Use for any other purpose will be deemed improper. MAK AG cannot accept any responsibility for the consequences of improper use.

Before using the tool read these instructions for use thoroughly and completely and comply with the instructions they contain. Keep these instructions for use close to the tool and pass them on to the next user.

Conformities

MAKcam V4 is conformed to following directives:

- Low Voltage Directives 2014 /35 /EU
- EMV 2014 / 30 / EU
- RoHS
- REACH

Device is equipped with integrated battery. Do not attempt to replace the battery yourself. The battery in MAKcam V4 should be replaced by KILIC Feintechnik or an authorized service provider.

Using a charger other than a MAKcam V4 can damage the camera battery and could result in fire or leakage. Only use chargers marked: Output 5V 1A.

Battery Warnings

To avoid danger of potentially fatal electric shock:

- Do not dismantle, open or shred integrated battery.
- Do not short-circuit the integrated battery.
- Do not remove integrated battery.
- Do not subject batteries to mechanical shock.
- In the event of a battery leaking, do not allow the liquid to come in contact with the skin or eyes. If contact has been made, wash the affected area with copious amounts of water and seek medical advice.
- Do not use any charger other than that specifically provided for use with the equipment.
- Seek medical advice immediately if a battery has been swallowed.
- Wipe the battery charging port with a clean dry cloth if they become dirty.
- Do not leave a battery on prolonged charge when not in use.

**Observe proper precautions when handling batteries.
Batteries may leak or explode if improperly handled**

**A defective machine is not safe and could cause injury or fire.
To avoid damage and any associated risk of injury or fire:**

- Protect the MAKcam V4 from environmental influences such as rain, frost and direct sunlight.
- Do not immerse the MAKcam V4 cables or connections in water.
- Do not put the MAKcam V4 or any individual parts in the dishwasher.
- Switch your MAKcam V4 off at the power switch before any cleaning operation
- Always wipe the MAKcam V4 with a damp cloth rather than a wet one, and protect it from prolonged exposure to water splash.
- Do not drop, disassemble, open, crush, bend, deform, puncture, shred, microwave, incinerate or paint the camera.
- Do not insert foreign objects into any opening on the camera, such as the USB port.
- Do not dry the camera or battery with an external heat source such as a microwave oven or hair dryer.
- Place the tool out of the reach of children.

Do not place naked flame sources, such as lighted candles, on or near the product.

Getting Started

Mounting the MAKcam V4 on your riflescope

1. First install the camera to scope mount on the ocular side of the scope as in the picture

Picture 1

Picture 2

2. Position the MAKcam V4 on the camera to scope mount so that the male lugs of the camera housing unit mate with the female lug recess in the mount and rotate clockwise until the locking lever engages and locks up.

Please verify that the camera and reticle are aligned. This can be verified by using the HDMI Mode. If not, adjust the mount on the ocular until they are and then tighten the screws on the mount. For the perfect image, it is vital that the alignment of camera and reticle is properly aligned.

3. If you want to dismount the MAKcam V4 unit from the scope you simply operate the locking lever and rotate counter clockwise. The camera to scope mount remains with the rifle scope permanently and is ready to have the camera unit attached without hindering it's normal rifle scope functions.

To verify if the view is perfectly aligned and perpendicular;

- Turn on the HDMI Mode or wifi mode
- Link the MAKcam V4 to the monitor via HDMI cable (see img.2) or connect wifi and start video stream on user interface
- Check if the device is properly aligned

Always check and be certain that the firearm is unloaded before undertaking any work upon it.

Please pay attention that when mounting/installing the camera unit on the rifle scope that the picture quality is clear and clean. When this is not the case you will have to adjust the camera to scope mount slightly forward or aft until clear and clean images are seen. This is best done when the camera unit is connected to the computer.

Charging the Battery

- Charge the battery by connecting the MAKcam V4 using the included charging kit.
- The MAKcam V4 power status led blinks during charging.
- Once the device is completely charged, power led status stops blinking.

Powering Camera On and Off

To Power On:

Press the Power button until the green LED turns on. When the yellow led blinks, MAKcam V4 is ready to use.

To Power Off:

Press the Power button until the green LED turns off

Battery Status

- Power led blinks on the status led bar if the battery drops below 30%.
- If the battery reaches 0% while recording, the camera saves the file and powers off.

Modes

Mode		Start	Stop
	Photo Mode	Press the shutter button. Red led blinks once.	-
